The four Ionic columns in Sylvan Grove. These columns originally graced the portico of the University's first building, which was erected in 1861 on the territorial site in downtown Seattle. They were salvaged when the building was torn down and installed on the new campus (very near the intersection of King and Pierce Lanes in the Quad) in 1911. In 1921 they were moved to their current home in Sylvan Grove. Replicas of these columns form the backdrop for our commencement stage. They remind us of our duty to preserve for future generations the priceless legacy of all those who have come before us.

The Gonfalons

Gonfalons are the banners suspended on crossbars that herald the entrance of each of the University's sixteen schools and colleges. The word derives from 12th century Florence, Italy, where each district had its own unique banner, or gonfalon. The gonfalons became symbols of state and were carried in processions by a chief magistrate or other elected official. Outstanding students are awarded the honor of carrying their school's gonfalon and leading their fellow graduates into the stadium. Our gonfalonieres this year are:

University of Washington
a World of Good

2024 Commencement

The University of Washington, on the occasion of its one hundred forty-ninth commencement, cordially welcomes all those who have come to join in ceremonies honoring the members of the graduating class of 2024.

The University, which was founded in 1861, has grown from modest beginnings in a wilderness society to become one of the world's preeminent research institutions. The more than 530,000 alumni and alumnae who have earned degrees at the University of Washington both reflect and extend its reputation as a global center of innovation and learning, a place where passion for discovery and a deep sense of social equity inspire the development of new knowledge for the common good.

Undergraduate education lies at the core of the University's mission, with sixty-seven percent of all students enrolled as undergraduates. At the same time, the University's exceptional faculty and facilities, the integration of advanced research and undergraduate teaching, and the availability of individualized and interdisciplinary programs, mean that graduates complete their baccalaureates not only with a firm academic foundation, but frequently with notable achievements in their chosen fields.

In graduate and professional education, a renowned faculty of scholars, researchers, artists, and visionaries is educating the next generation of doctors, lawyers, scientists, engineers, teachers, and skilled professionals. University faculty and students often work collaboratively with our region's acclaimed computer science, biotechnology, and aerospace industries to design and create a wide range of innovative technologies for the 21st century. Indeed, the University itself is an engine of economic growth, generating $15.7 billion annually in the state of Washington in terms of direct, indirect and induced economic impact. In the most recent Reuters ranking of world universities on innovation, UW was ranked No. 5 overall and retained its position as the most innovative public university in the world.

Those who graduate today will take their place among society's foremost leaders in science and the arts, education, business, law, health care, and public service, enriching the cultural vitality and well-being of peoples around the world. To the members of the class of 2024, the University extends its sincere congratulations. Their accomplishment is one in which the University takes deepest pride.

The Mace and the Medallion

University of Washington ceremonial occasions begin with the entrance of the University Mace, carried by Joseph Janes, associate professor in The Information School and University Marshal. A mace was originally a weapon used by mounted knights for self-protection. It since has become a symbol of authority indicating that the proceedings to follow have official sanction.

The University Mace bears the inscription: "Presented to the University on the occasion of its Centennial by the University of Washington Alumni Association, 1961." Its triangular headpiece is topped by a silver reproduction of Drumheller Fountain. The three sides bear engravings of the University seal, Denny Hall (the first building on the present campus), and the original University building on the Territorial campus.

The tradition of the president's seal medallion began in 1958, when Dr. Charles E. Odegaard was inaugurated as the University's twenty-fourth president. The seal medallion is worn by the President at official ceremonies, such as commencement.

On one side is the University seal with a facsimile of the four columns from the original territorial University building and the University Motto, Lux Sit, meaning "let there be light." On the other side are the words, "Seal of the President of the University."

The Academic Regalia and Founding Order

The academic dress worn by scholars originated in the Middle Ages. When European universities were taking form in the twelfth and thirteenth centuries, the scholars usually were clerics as well, and they adopted garb similar to that of their monastic orders. Buildings were cold and drafty, so caps and warm, floor-length capes with hoods were necessities. As the control of education passed from the churches, the garb was modified in various ways, and there was great diversity in color and style of cap, gown, and hood worn at the different institutions. The custom of wearing academic dress was brought to America in colonial times, but it was not until 1895 that a standardized code of academic dress was established and followed by most colleges and universities in the United States.

Both cap and gown are symbols. According to legend, the privilege of wearing a cap was the initial right of a freed Roman slave. The academic cap, therefore, has become a sign of the freedom of scholarship. The flowing gown has become symbolic of the democracy of scholarship, for it covers clothing that could indicate rank or social stratum. At the University of Washington, the bachelor's and master's gowns are black. The matching Oxford cap, or mortarboard, has a long tassel fastened to the middle of the top. The tassel is worn pendant over the left side of the cap. The colors of the tassels or hoods are distinctive of the candidate's school or college.

The doctoral gown at the University of Washington is purple with velvet facing and three bars of velvet on the sleeves. Doctoral degree candidates in Medicine, Law, Dentistry and Pharmacy wear the black professional doctoral gown with black chevrons on the sleeves. Advanced degree (doctoral and master's degree) candidates also wear the academic hood, the traditional garment that signifies high scholarly attainment. The colors of the master's and professional degree hoods are distinctive of the candidate's degree earned. The doctoral hood of bright satin purple and gold reflects the colors of the University of Washington.

Graduates enter the stadium and are presented for degree conferral according to the founding order of the schools and colleges.

The schools and colleges awarding degrees were established in: College of Arts and Sciences, 1861; College of Education, 1878; School of Pharmacy, 1894; School of Law, 1899; College of Engineering, 1901; College of the Environment, 2009 (College of Forest Resources, 1907, School of Fisheries, 1919); Graduate School, 1911; The Information School, 2001 (Graduate School of Library and Information Science, 1911); Foster School of Business, 1914; School of Nursing, 1945; School of Dentistry, 1946; School of Medicine, 1946; College of Built Environments, 2009 (College of Architecture and Urban Planning, 1957); School of Social Work, 1958; Evans School of Public Policy and Governance, 2000 (Graduate School of Public Affairs, 1962); School of Public Health, 1970.

The Distinguished Teaching Award for Teams has been conferred on the Marine Geoscience Education, Oceanographic Discovery, Undergraduate Collaboration (GEODUC) Scholars Program Team: Kerry-Ann Naish, Professor of Aquatic and Fishery Sciences & Marine Biology, LuAnne Thompson, Professor of Oceanography, Jose M. Guzman, Associate Teaching Professor in Aquatic and Fishery Sciences & Marine Biology, Mikelle Nuwer, Associate Teaching Professor of Oceanography, Jane Dolliver, Program Manager, College of the Environment.

Carly Gray

Eric Villiers

Two graduate students with teaching responsibilities receive the **Excellence in Teaching Award** for 2024. They are Carly Gray, doctoral candidate in psychology and Eric Villiers, doctoral candidate in theatre history & performance studies.

Grace John-Stewart

The recipient of the **Marsha L. Landolt Distinguished Graduate Mentor Award** is Grace John-Stewart, Professor, Global Health, Epidemiology, Medicine & Pediatrics.

Anne-Marie Davis

Anne-Marie Davis, Collections Coordinator, Odegaard Undergraduate Library, and Anthropology Liaison Librarian, University Libraries, is the recipient of the **Distinguished LIbrarian Award**.

David M. La Fazia

David M. La Fazia, Lecturer, School of Social Work, has received the **Distinguished Contributions to Lifelong Learning Award**.

President's Medalists

The President's Medal is presented annually by the University of Washington president to graduating seniors who have achieved the most distinguished academic records in their class. On the Seattle campus, one medal is given to a student who has completed at least three-fourths of their degree requirements at the University of Washington. The other is given to a student who entered the University with at least 60 transfer credits from a Washington community college.

This year's medalists are Nathan Lincoln Loutsis, of Kenmore, Washington, who is graduating Summa Cum Laude with a Bachelor of Arts degree in Political Science: International Security and Tuan Trung Vu, who is graduating Summa Cum Laude with a Bachelor of Science degree in Biology: Physiology.

Honorary Degree

In honor of her brilliant career and historic accomplishments in the field of atmospheric science, the University is proud to confer upon Susan Solomon the degree of Doctor of Science, *honoris causa*.

HONORARY DEGREE CITATION

Susan Solomon, as an internationally renowned atmospheric scientist, your impact on scholarship, culture, and societal well-being is profound. Your achievements have left an indelible mark on the fields of atmospheric science and climate research, particularly through your insights in explaining the cause of the Antarctic ozone hole, the irreversibility of global warming linked to anthropogenic carbon dioxide emissions, and the influence of the ozone hole on the climate of the southern hemisphere.

Your groundbreaking research played a crucial role in identifying and elucidating the mechanisms behind the Antarctic ozone hole, leading to the historic Montreal Protocol—an international treaty that successfully curtailed the use of ozone-depleting substances and helped protect the Earth's fragile ozone layer. Your contributions have deepened scientific knowledge and led to tangible policy actions that are safeguarding the environment and the health of future generations.

With your Ph.D. in chemistry from the University of California, Berkeley, you began your career as scientist for NOAA in Boulder, Colorado, before joining the Massachusetts Institute of Technology where you are the Lee and Geraldine Martin Professor of Environmental Studies.

By bridging the gap between scientific research and policymaking, you have been instrumental in driving global efforts to address climate change. As co-chair of the Intergovernmental Panel on Climate Change (IPCC) Working Group I, you led the process that produced the influential IPCC Working Group I Fourth Assessment Climate Science Report. When IPCC received half of the Nobel Peace Prize in 2007, you shared a stage, receiving the prize with former Vice President Al Gore, who received the other half. This accomplishment exemplifies your dedication to bringing together diverse perspectives to tackle one of the most pressing challenges of our time.

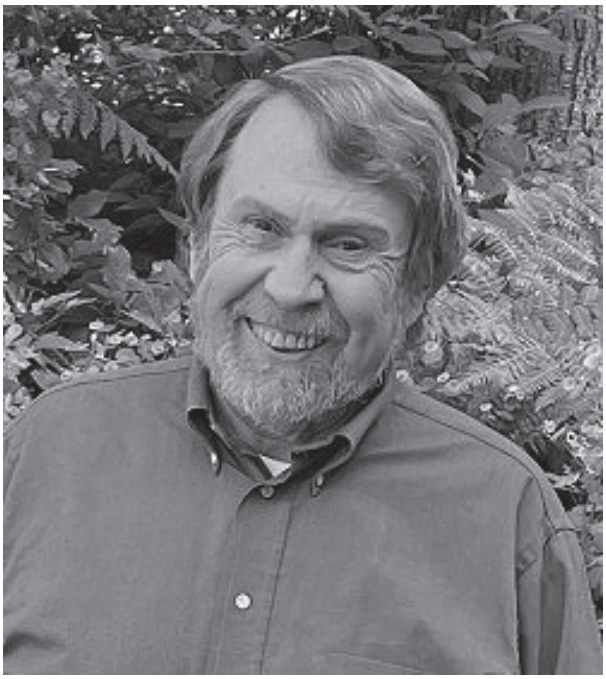
As a tireless advocate for public understanding of climate science, you have expanded awareness of the environmental issues we face. And your clear and compelling communication style has made complex scientific concepts accessible to a wide audience, fostering a sense of urgency and collective responsibility to address environmental changes.

Your contributions have been recognized by being elected as a member of National Academy in Sciences, receiving numerous awards including U.S. National Medal of Science, and being awarded honorary doctor degrees by 20 universities including University of Colorado, Oxford University and Duke University.

You have a close connection with the University of Washington as you spent two sabbaticals with the Department of Atmospheric Sciences in the College of the Environment, during which you offered a graduate course on ozone depletion and climate change. You also were the Robert Fleagle Endowed Lecturer, speaking on "A Brief History of Environmental Successes."

For your exceptional contributions to scholarship, your transformative impact on global environmental policy, and your unwavering dedication to fostering a more sustainable and informed society, the University of Washington is proud to confer upon you the honorary degree of Doctor of Science, *honoris causa*.

Commencement Speaker



Daniel James Brown, celebrated author of "Boys in the Boat," is this year's Commencement speaker. In honor of his extraordinary career, the University is proud to confer upon him today the degree of Doctor of Human Letters, *honoris causa*.

HONORARY DEGREE CITATION

Daniel James Brown, as a writer, you are devoted to bringing compelling historical events to life.

You have told the story of Japanese American heroes of World War II through your book "Facing the Mountain." In "The Indifferent Stars Above," you have chronicled a Donner party bride's 32-day trek through the Sierra Nevada Mountains. And on the pages of "Under the Flaming Sky," you reveal the social, economic and environmental causes of the Great Hinkley Firestorm of 1894.

But against all odds, it was your third book that has become a global phenomenon by introducing an enormous audience to "an obscure story about a bunch of scrawny college kids who took on the world in 1936," as Seattleite and UW graduate Tim Egan wrote in the New York Times.

From the moment Joe Rantz, in the last months of his life, relayed to you the story of the 1936 nine-man University of Washington rowing team, you spent the following four years deep in research, poring over newspaper clippings, letters, diaries and photographs. You interviewed each rower's family members starting with Joe's daughter, Judy Rantz Willman who collaborated with you at each step. You pulled together every thread to craft a compelling story that brings to life the team, coaches and boatbuilder who transformed the sport of rowing and brought together our University, city, state and nation. Ten years after "The Boys in the Boat" was released, the story was again told on the screen.

The values embodied in "The Boys in the Boat" are the same values that unite us today. We — Huskies, Washingtonians, Pacific Northwesterners — have always come together to pursue bold accomplishments. It's why this epic tale of innovation, collaboration and shared success continues to endure and inspire.

A graduate of Diablo Valley College, University of California Berkeley and University of California Los Angeles, you taught writing at San Jose State University and Stanford University before shifting to technical writing and editing. Today you continue to write nonfiction full time, from your home near Seattle.

For your efforts to capture the perseverance of ordinary people doing extraordinary things and for your achievements in nonfiction that inspire future generations of writers, historians and researchers, the University of Washington is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Baccalaureate Honors

Baccalaureate Honors are based on the entire University of Washington scholastic record of each degree candidate. For members of the graduating class of 2024, the distinction of *summa cum laude* represents the top one-half of one percent (.5%) of the graduating students, *magna cum laude* the next three percent (3.0%) and *cum laude* the next six and one-half percent (6.5%). These honors are awarded to those who have completed not less than 90 credits at this institution. A single gold cord is worn by graduates who have earned these honors.

A baccalaureate honors designation for a June candidate is considered tentative and is dependent upon the student satisfactorily completing the spring quarter. June candidates are signified by an asterisk.

Rise Up With Pride For Washington

Lyrics by Catherine Henderson
Class of 2008
Music by Bill Conti

Rise up with pride for Washington
For purple and for gold
From far and wide we meet as one
As Huskies proud and bold

Chorus
Washington we hail to thee
Honor, truth, integrity
Forever shine from lake to shore
Your light upon us ever more.

Rise up with pride for Washington
Together hand in hand
We will proclaim our loyalty
In song throughout the land

Chorus
Washington we hail to thee
Honor, truth, integrity
Forever shine from lake to shore
Your light upon us ever more.
